EXPERIENCE

Proxym Internship | 2024

Back-End Developer

- Developed and maintained the backend of an internal expense tracker application using Spring Boot and MySQL.
- Implemented RESTful APIs and contributed to data handling logic.
- Collaborated with senior developers and followed Agile development practices.

Cospace Room Management Website | 2025

Full-Stack Developer

- Built a full-featured web app for managing classroom and meeting room reservations using React (frontend) and Spring Boot (backend).
- Designed and managed SQL databases for room availability and booking data.
- Worked in a small team, taking responsibility for backend integration and API development.

Hackathon Participant

2023 – 2025

- Competed in 3 hackathons: Hack for health (ATAST), CodingMoonChallenge (EPI), and ISSAT Sousse GoMyCode.
- Designed and prototyped innovative solutions under time constraints, strengthening team collaboration and fast problem-solving skills.
